Longer growing seasons can correspond to increased agricultural production in a few areas.

Scope of more plant growth and milder climates in some frozen regions of the earth such as Siberia, Antarctic, and the Arctic.

ADVANTAGE

Global warming can result in many serious alterations to the environment, eventually impacting human health.

DISADVANTAGE

It can also cause a rise in sea level, leading to the loss of coastal land, a change in precipitation patterns, increased risks of droughts and floods, and threats to biodiversity.

The effects are already
evident in areas like
Nunavut, Canada,
where Inuit hunters are
facing survival
challenges due to the
thinning of the ice.

Fewer injuries or decreased death rate as a result of arctic conditions.
The next ice age can be possibly prevented.

Earth, they trap the sun's heat. This leads to global
